ASYCUDA++

Appendix C –
Heirarchical Menus

ASYCUDA++ Functional Manual

V1.15

ASYCUDA ++ Heirarchical Menus.

Contents of Appendix C.

About This Section

This section shows the menu structure of all the ASYCUDA++ menus in a herarchical or flow chart format to allow the user to see the functionality of the individual modules on paper.

This is particularly useful in the early stages of an Implementation Project where the Computer hardware or ASYCUDA++ software may not be available to the National Project Team members for reference.

It is possible to select this type of menu structure on screen if it is preferred to the drop down menu system that is supplied with the ASYCUDA++ system as default settings.

Amendment Control Grid

Periodically, amendments to this Reference Document will be issued. Each amendment batch will be serially numbered and dated. This Amendment Control Grid is provided in order to maintain a record of the receipt and incorporation of amendments into the Reference Document and thereby ensure that it is kept fully up to date.
